Browser Extension

Bitwarden
□□□

the extension icon and you’ll see a list of available login information for the website that you are viewing.

The browser extension also syncs with the server on a regular basis, this means that if you need to look up any of the information that you have stored in Bitwarden, all you have to click the extension and click search

Desktop Applications

Desktop Applications

Bitwarden Desktop Application Screenshot

Bitwarden desktop applications are also available for Windows, Mac OS, and Linux. They are very similar to the Bitwarden Web Vault and sync frequently with the Bitwarden Server. The desktop applications are fully featured, responsive applications that can be used to work with your password database in a local desktop environment. The Bitwarden Desktop applications also allow you to work with your data offline as they do not require a constant connection to the Bitwarden server.
