The diagram illustrates a supply chain or information flow system. At the top, 'Merchant A' is associated with a long horizontal bar. Below it, 'B' is associated with a shorter bar. The central part of the diagram features 'Pay9/Merchant' with a bar, and '(Inventory)' with a bar. To the right, 'Merchant A' is associated with a bar. Below this, '(WMS)' is associated with a bar. The bottom section shows 'Merchant B' with a bar, and 'Pay9' with a bar. The diagram is filled with many small rectangular boxes, some of which are labeled with 'A' and 'B', representing individual data points or inventory units. The overall layout suggests a complex network of interactions between different entities in a supply chain.
